THE POSITION This role will involve primarily producing and supporting C# MVC and Blazor applications. All applications utilise an MS SQL backend.

There will be an occasional requirement to support our Wealth Management development team with SSRS reporting and general C# MVC work

The role will allow the successful candidate to be involved in a diverse array of project types from initial discussions with stakeholders through to deployment, documentation, training and high level support. We believe a developer should feel a sense of pride and ownership of the project.

Day to day work will include:

- Design, develop and support .NET applications.
- Creating documentation (technical and user guides)
- Ongoing report development for bespoke client needs on an ad-hoc basis.
- Escalating and resolving technical issues, working with our suppliers and staff.
- Assisting with system upgrades and the roll out process in partnership with our system suppliers.

THE CANDIDATE The candidate will have working knowledge of:

- C# / .NET /
- MVC / Blazor
- HTML / CSS / JavaScript
- MS SQL Server

The candidate will:

- Be a self-starter, able to prioritise, organise and schedule tasks and resource.
- Be confident, analytical and with the ability to communicate technical matters.
- Be interested in a long term career with our firm.
- Be a team player.

Experience that will differentiate the candidate:

- MS SQL Server Reporting Services (SSRS)
- Server Sided Blazor
- Test Driven Development
- GIT
- TeamCity CI/CD
- Client service experience, particularly with private clients.
- Working in investment, accounting or banking areas.
